## DETAILED ACTION

### ***Election/Restrictions***

1. Claims 18-26 remain withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Species N, M, F, H, K, L, J, C and E, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on May 5, 2004.

### ***Drawings***

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the adjustability of the length of the pedal or the means of adjusting the length of the pedal must be shown or the feature(s) canceled from the claim(s). Since this limitation or feature is not shown in the drawings, the examiner will not give the limitation any patentable weight in order to expedite the prosecution. No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering

Art Unit: 3764

of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Objections***

3. Claim 1 is objected to because of the following informalities:

Claim 1, on line 24 is the term "flowing". It should be replaced by the term --following--.

Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 17 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 recites the limitation "the whole shoe", "the toe joint", "the axis of rotation", "the shoe heel", "the foot", "the bicycle", "the descending phase" "the upper neutral point" and "the lower neutral point" in lines 3, 4, 5, 7, 15, 16, 25 and 26 respectively. There is insufficient antecedent basis for these limitations in the claim. In claim 1, the phrase "the height and the width of said square rigid part being approximately the same as the height of the heel of a shoe" in lines 8-9 is indefinite since the height and width cannot be ascertained until a shoe is engaged with the pedal.

That is, the claim describes the invention in terms of a user having a particular shoe size; thus whether a device falls within the scope of the claims cannot be ascertained until a user with a particular shoe size engages the device. Consequently, the claim is indefinite. The phrase "a rigid part matching the shape of the shoe" is indefinite for the same reason.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Angeltun '006 discloses a bicycle pedal that allows for added torque during cycling exercise due to the secure attachment of a user's heel/shoe heel to the pedal.

Ferguson '696 and Nutile et al. '138 each disclose a pedal having a rigid element that partially envelops a user's foot/shoe for securing said user's foot/shoe to a pedal.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3764

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
